Covid-19 Update April 2021

It's now been just over a year since we 'closed the gates' to the public and stopped volunteers and visitors from entering Sanyu and interacting with the children and staff. We have missed our volunteers and visitors but needed to take strict measures to protect the Sanyu Family. Now that Covid-19 cases are lower in Uganda and vaccinations are happening, we have some exciting news...the gates are now OPEN!

Visitors are welcome once again and will be given an introductory talk and then a tour of the home. They will need to wear a mask at all times.

Local volunteers are most welcome once again to come and help out with the daily running of the home. Volunteers will be directed to spend their time mainly away from the children – helping with laundry, in the kitchen or around the compound. If help is needed with the children then volunteers will be required to wear a mask at all times. If volunteers are suffering from flu/cough then they will not be allowed to work with the children and will need to wear a mask the whole time.

International volunteers are welcome to travel to Uganda and join us once again. For the first four days of their stay, they will be required to self-isolate in the guesthouse, or work away from the children, wearing a mask at all times. Once they have taken a Covid-19 test and received a negative result then they will be allowed to fully interact with the children. International volunteers will be asked to base themselves at Sanyu and not go out into the local community unless a prior agreement has been made with Director Barbara.

As always, all volunteers will need to provide a copy of a recent criminal record check as well as character references.

Please do get in touch with Director Barbara and she can give you more information about volunteering and help you to plan your visit. We look forward to meeting you!

Barbara N. Mutagubya

Director- Sanyu Babies' Home
